

To whom it may concern,

Due to our geographical location, we are unable to receive AM/FM radio signals that would allow us to monitor weather and traffic information. XM radio's Instant Traffic & Weather is well worth the monthly cost we pay for insuring we are able to plan our driving trips safely, and to gain a better understanding of impending weather changes.

I am confident that the negative [self interest] efforts put forth by the NAB will be as much a source of disappointment to others who have limitations such as ours. We strongly support XM Radio.

Sincerely,

Eric Kamien
Very Satisfied XM Radio Listener
